GOING GREEN THIS HOLIDAY SEASON

The festive season has arrived, and this year HMC is celebrating with some exciting and far-reaching initiatives including the YES program aimed at taking control of our community's energy consumption. We've also partnered with organizations such as Tree City USA, hosted numerous community cleanups, and made the switch to LEDs in our communities as well as offices.

Our families and yours can reflect the joy of the holidays in your home while also focusing on safety and energy conservation. As you contemplate commitments for the new year, consider making a difference in your community. One impactful step is switching your holiday lights to LED. By doing so, you can reduce energy consumption by up to 90% compared to using incandescent lights. It's a small change that yields significant positive effects for both your community and the environment. LEDs are more efficient, last much longer, and produce less heat, so your home is safer. You can save even more by using LED lights on a timer.

During this season of thankfulness and generosity, consider contributing to the future of us all by living consciously.
